Planting depth: 1/8”–1/4”  
Approximate seeds/lb: 183,000  
Seeding rate: 30–35 lbs/A  
Days to germination: 7–14  
Main usage: Pasture, baling  
Height at maturity: 3’–4’  
Length of stand: Permanent if managed well  
Reproduces by: Seed

### FORMULATION

50% Bronson Tall Fescue  
40% STF-43 Tall Fescue  
8.5% Gallant Red Clover  
1.5% Jumbo II Ladino Clover

---

A popular mix with beef producers in the Midwest. Soft leaf, palatable fescues, with just the right amount of clover.

---

Enduro-Plus consists of only the best forage varieties available. All varieties in the Enduro-Plus product line have been developed and tested for forage quality, yield, and persistence. These products have been designed to give you higher relative feed values, which translates into more milk per acre, more beef per acre, or more energy for horses.
