

Payload Tall Fescue

Its strong vigor, large crown size, and aggressive regrowth help consistently produced more forage yield.

FEATURES

- Medium maturity tall fescue
- Reaching head emergence approximately 2 days later than KY-31
- Season long production
- Excellent disease package with superior resistance to stem rust
- Wide flag leaf, dark green color
- Strong vigor and crown size
- Bred in Indiana for regional adaptation

As a forage yield leader, Payload is well adapted for hay production, while its palatability lends itself well to pasture.

TALL FESCUE FEATURES

Plant type: Perennial Grass
 Planting dates: March–May or Aug–Sept
 Soil pH: 5.0–8.0
 Soil adaption: Wide, dry-wet
 Planting depth: 1/8”–1/4”
 Approximate seeds/lb: 227,000
 Seeding rate: 10–30 lbs/A ; 5–15 lbs/A mix
 Days to germination: 10–12
 Main usage: Hay, pasture, stockpiling
 Height at maturity: 24”–40”
 Length of stand: 10+ years
 Reproduces by: Seed, short rhizomes
 Pounds per bushel: 25
